*Welcome back to the days of carefree boating with the return of a classic.*

The simple yet elegant lines of the *Winner by WaveJumper* showcase a clean, compact design and true versatility.

The modified V-hull produces a barely-there wake and an exceptionally stable ride while the modest, compact proportions result in a package that is economical to run, easy to trailer, and easy to store.

### **Classic Design**

The simple yet classic runabout lines of the Winner by WJ showcase a clean, compact design and true versatility. A morning fishing trip can easily shift to a late morning ski session, and an afternoon of water sport can comfortably culminate with a leisurely sunset cruise with friends.

### **Stability and Ride**

We have capitalized on the original hull design which put Winner on the map. The modified V-hull produces a barely-there wake which means that shredding the morning glass doesn't equate to environmental damage, and landing the "big one" won't result in accidentally dumping your partner over the side.

### **Economy and Ease**

The modest compact proportions result in a package that is economical to run, requiring less horsepower to operate, ease of trailering and towability, and the whole boat takes up the space of the family sedan, meaning it can fit in your home garage, saving money on storage rentals and pricey wraps.
